Cleft Lip and Palate | Children's Hospital of Philadelphia
Cleft lip and palate are birth defects of the mouth and lip, also known as oral-facial clefts. A normal fetus has a split lip and palate, but early in pregnancy, the sides of the lip and the roof of the mouth should fuse. Failure of fusion results in cleft lip and/or cleft palate. About 6,000 to 8,000 kids are born in the United States with oral-facial clefts every year; Cleft defects are ...

Cleft Lip and Cleft Palate - ASHA
A baby can have a cleft lip, cleft palate, or both. A cleft lip may be on one or both sides of the upper lip. The split may also be in the upper jaw and gum. A cleft palate is an opening in the roof of the mouth. The front part is the bony hard palate. The back part is the soft palate, made of muscle. A cleft palate can be on one side or both Cleft lip and cleft palate - Diagnosis and treatment
